The Bullard Classic Series hard hats and caps continue to set the standard for industrial head protection.

Comfort

Featuring wider brims than most hard hats, Classic caps and hats offer increased protection from rain, snow, dust, and harmful ultraviolet (UV) rays. The six-point suspension, standard in all Classic Series products, has 1" (2.54 cm) wide nylon straps, offering increased balance and comfort. The full-profile shell also enhances ventilation.

Select either the ES-Ultra self-sizing suspension or the ESRTSL Sure-Lock® non-slip ratchet suspension. Both suspensions feature an exclusive Sportek™ terry cloth-like removable, brow pad for superior absorbency and comfort. Vertical adjustment hanger keys on the front and rear positions of the headband form the basis for a truly customized fit.

Versatility

With three distinctive models from which to choose, each Classic Series hard cap and hat style offers unique benefits to the wearer.

2-Year Warranty

Demanding quality standards and leading edge manufacturing processes allow Bullard to offer a two-year limited warranty – the longest in the industry.

Decoration

No other manufacturer offers more decorating flexibility and capability than Bullard. Hard hats and caps can be decorated with company logos or safety slogans in up to six colors in virtually any lateral position on the shell.

Visit edeco.bullard.com for more details.

Worker visibility can be increased with Scotchlite® reflective stripes or small reflective strips in a multitude of colors. Bullard offers 23 standard shell colors and will match other colors for companies requiring specific shades. Bullard Classic caps and hats meet/exceed ANSI Z89.1-1997, Type I, Class E and G requirements.

Models 3000 and 3000R, our most popular Classic cap models, are among the most adaptable hard hats available. Accessory slots accept faceshields, hearing protection, welding helmets, or communication devices.

Models 302RT and 302RTR offer the same features as the 3000, and add a rain trough around the brim to channel away rain, snow, and condensation. These models are ideal in wet or humid work environments.

Models 303 and 303R are preferred by wearers who desire a full-brim hat. This style offers more protection from harmful ultraviolet rays, as well as from glare, moisture, and dust.

Suspension Choices for Bullard Classic Series Products

Model 3000 with ES-ULTRA Suspension

1. Vertical Adjustment
2. Nylon Crown Strap
3. Hanger Key
4. Absorbent Brow Pad
5. Sizing Buckle

⚠ WARNING

These hard hats provide limited protection by reducing the force of falling objects striking the top of the shell. While they will provide limited protection in other parts of the shell, they are not designed to provide front, side, or rear impact protection. Avoid contact of the hard hat with electrical wires. Never alter or modify shell or suspension system. Always use Bullard replacement parts. Inspect your hard hat shell or suspension regularly. Make it a habit to check for cracks, frayed straps, and any sign of damage before putting on your hard hat each and every time. If you notice any sign of wear or damage, the shell and/or suspension should be destroyed IMMEDIATELY and replaced. If the hard hat has been struck by a forcible blow, it must be destroyed and replaced immediately, even if there is no visible damage.

Bullard products are manufactured to exacting specifications. Any alteration or modification of these products by the user may adversely affect product performance. This data sheet is in summary form only for easy reference. Refer to labels, instructions, and other literature accompanying the product for more complete details regarding use, maintenance, warnings, performance capabilities, complete specifications, and precautions. Failure to heed these warnings could result in death or serious injury.
